# No-Code Website Design

---

**The Beginner's Guide to Building Professional Websites Without Coding**

**Level:** Beginner

**Instructor:** Abdirahman A. — Founder, DIGITA

**Powered by:** DIGITA HUB™

**Hey Builder,**

Welcome to *No-Code Website Design*.

This course is for anyone who's ever asked:

**“Can I really build a website without coding?”**

Short answer: YES. And you're about to prove it.

Whether you want to create a personal portfolio, a landing page for your business, or a full-on e-commerce store — no-code tools like **Wix, WordPress, and Carrd** have your back.

This course will guide you from zero to your first live site — step by step, no jargon, no tech overwhelm.

Let's get building 🚀

— **Abdirahman A.**

## What You'll Learn

- What no-code design really is and how it works
- Top tools to use for building without coding
- How to choose the right platform for your goal
- The basic layout every clean website should follow
- How to launch your first website (free or low cost)

## Main Course Content

### Part 1: What is No-Code?

No-code website design means using drag-and-drop platforms to build websites without writing code.

Top beginner platforms:

- Wix (Easy & visual)
- WordPress + Elementor (Flexible & scalable)
- Carrd.co (Simple one-pagers)
- Shopify (E-commerce)
- Google Sites (Fast, clean, and free)

If you can type, drag, and click — you can build.

---

## Part 2: Choosing Your Platform

Goal	Platform Suggestion
Portfolio or Resume	Carrd or Wix
Blog / Business Website	WordPress + Elementor
Online Store / E-Commerce	Shopify or Wix
Event or One-Page Site	Carrd or Google Sites

Start with one that suits your current need — you can always grow from there.

---

## Part 3: Website Layout Basics

Here's the must-have structure for any small website:

1. **Hero Section** – Bold headline + image + call to action
2. **About Section** – Who you are and why they should care
3. **Services/Products** – What you offer
4. **Testimonials/Proof** – Why people trust you
5. **Contact/CTA** – How they can reach or hire you

**Pro Tip:** Don't overwhelm. Clean, clear, and fast always wins.

---

---

## Part 4: Getting Started

For WordPress with Elementor:

1. Choose a host (Truehost, Bluehost, or Hostinger)
2. Install WordPress
3. Add Elementor plugin
4. Choose a free template
5. Replace with your content + visuals
6. Hit Publish — You're live!

Use Unsplash or Pexels for royalty-free images.

---

## Part 5: Design Tips for Beginners

- ✓ Use 1–2 fonts max
  - ✓ Stick to 2–3 brand colors
  - ✓ Always optimize for mobile
  - ✓ Keep sections short and scannable
  - ✓ Make buttons clear: “Contact Me”, “Order Now”
  - ✗ Don't overload with animations
  - ✗ Don't use 5 different colors or fonts
  - ✗ Don't forget to proofread
-

## Quick Tools You Can Start With

Tool	Use
WordPress	Site builder w/ Elementor
Wix	Drag-and-drop websites
Carrd	One-page websites
Canva	Visual banners & graphics
Google Domains	Buy your own domain
Google Forms	Create simple contact forms

## Your Assignment

Time to build your first site.

1. Choose a platform (WordPress, Wix, Carrd)
2. Use a template to build a 3–5 section website
3. Include:
  - A bold headline
  - About section
  - One service or product
  - Contact form or WhatsApp link

- 
4. Hit publish!
  5. Share your live link with DIGITA for a free review
- 

### **Internship Opportunity**

We connect web design learners with real projects from small businesses.

- ✓ Build real websites
- ✓ Gain practical experience
- ✓ Get added to DIGITA's Web Talent Pool

### **Final Note from Abdirahman**

You don't need to know code to be a creator. You just need courage, curiosity, and the willingness to try.

Websites are digital real estate — and today, you just bought your first plot. Start small. Stay consistent.

Build, test, and grow — your skills will follow.
